

Sentinel SHK CodeCover Patch Release – README

Problem resolved:

This patch resolves a security vulnerability in Sentinel Code Cover for the legacy Sentinel SuperPro.

This patch is not applicable for legacy operating systems such as Windows 95 and Windows 98.

JIRA SR Fixed:

- SM-42945

Delivery components:

This deliveries contains following files:

1. SkShell.dll
 - SHK CodeCover 32-bit, DLL version 2.8.0.20.
2. SkShell641.dll
 - SHK CodeCover 64-bit, DLL version 2.8.0.20.
3. SkShell642.dll
 - SHK CodeCover 64-bit, DLL version 2.8.0.20.
4. Readme.pdf
 - This file

How to use:

This patch is **standalone** to Sentinel Sentinel Keys\1.3.1 installed on the target system. Please follow below steps to use package

1. Go to “Sentinel Keys Toolkit” under installation directory of Sentinel Keys. User can find the directory at location <Install Dir>/ Sentinel Keys\1.3.1\Sentinel Keys Toolkit.
2. Make backup copy of original files of SkShell.dll, SkShell641.dll and SkShell642.dll.
3. Copy above package DLLs to same directory.
4. Start using Toolkit or command line

Note: Microsoft MSVCR71.dll should be installed on the system or placed with the application.
