

# Sentinel UltraPro Shell Patch Release – README

## Problem resolved:

This patch resolves a security vulnerability in Sentinel Shell for the legacy Sentinel UltraPro.

This patch is not applicable for legacy operating systems such as Windows 95 and Windows 98.

## JIRA SR Fixed:

- SM-42945

## Delivery components:

This deliveries contains following files:

1. RBS32SP.dll
  - UltraPro Shell 32-bit, DLL version 1.1.4.26.
2. RBS64SP1.dll
  - UltraPro Shell 64-bit, DLL version 1.1.4.26.
3. RBS64SP2.dll
  - UltraPro Shell 64-bit, DLL version 1.1.4.26.
4. Readme.pdf
  - This file

## How to use:

This patch is **standalone** to Sentinel UltraPro 1.3.0 installed on the target system. Please follow

Below steps to use package

1. Go to “Sentinel Keys Toolkit” under installation directory of Sentinel Keys. User can find the directory at location <Install Dir>/ SafeNet Sentinel\UltraPro\1.3.0\Toolkit.
2. Make backup copy of original files of RBS32SP.dll, RBS64SP1.dll and RBS64SP2.dll.
3. Copy above package DLLs to same directory.
4. Start using Toolkit or command line

**Note:** Microsoft MSVCR71.dll should be installed on the system or placed with the application.
